THOMAS 3004

The Thomas 3004 free standing banknote and coin changer provides a simple, dependable solution where high volumes of note change, coin change and token vending, or a combination of these is required.

The usual mode of operation will change notes to coins / tokens and high value coins to lower value coins / tokens. However, the machine is part of a range that can be tailored to suite a variety of applications.

PART#
TA3004
